Observations:

1. We want to carry weights as it was in original model, so we are carrying weights = 'imagenet'
2. The very first layer is input layer which accept image size = (224, 224, 3). Our image size are different, so we need to change the parameter - image_size in the first layer. Our size will be: (224,224, 3)
3. We want to change the last layer as we have 10 class classificatoin problem. So, we will not include top layer
4. Also, we will not train all the layers except the last one as we will have to train that. So, we will set properties for trainable = False excet for the top i.e. last layer.

Modelling WITH Transfer Learning

Here we will prepare model as per our requirements

```
print("Summary of Custom VGG16 model.\n")
print("1) We setup input layer and 2) We removed top (last) layer. \n")
```

```
# let us prepare our input_layer to pass our image size. default is (224,224,3). we will change it to (224,224,3)
input_layer=layers.Input(shape=(48,48,3))
```

```
# initialize the transfer model VGG16 with appropriate properties per our need.
```

```
# we are passing paramers as following
```

```
# 1) weights='imagenet' - Using this we are carrying weights as of
original weights.
# 2) input_tensor to pass the VGG16 using input_tensor
# 3) we want to change the last layer so we are not including top
layer
model_vgg16=VGG16(weights='imagenet',input_tensor=input_layer,include_
top=False)

# See the summary of the model with our properties.
model_vgg16.summary()
```

6. Model Evaluation

This function helps to predict individual image supplied to it

Function 1

```

def predict(img_name):
    img=image.load_img(img_name,target_size=(48,48))
    img=image.img_to_array(img)
    plt.imshow(img.astype('int32'))
    plt.show()

    output=np.argmax(prediction)

    print(class_names[output] + ": " +
Get_Element_Name(class_names[output]))

```

Function 2

This function plots the image supplied in array

```

def plot_image(i, predictions_array, true_label, img): # taking index
and 3 arrays viz. prediction array, true label array and image array

```

```
